

ACa ASYMMETRICAL ASPHALT CUTTER

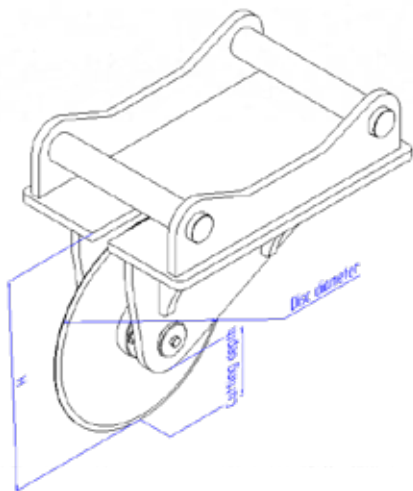

Asphalt cutter for excavators from 12 to 30 t. A 450 mm steel disc cuts asphalt up to 150 mm deep. Two sizes, AC-18 and AC-30, weighing 99 and 165 kg. Available as the asymmetrical ACa and the symmetrical ACs.

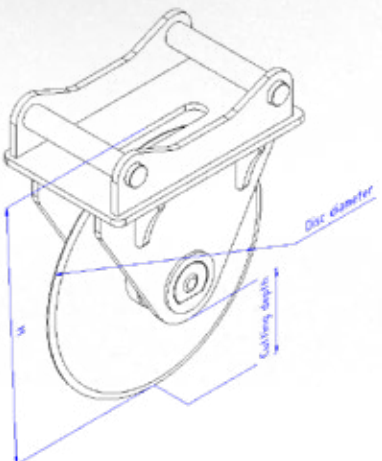

Key Features:

- 450 mm steel disc
- Cutting depth up to 150 mm
- Symmetrical or asymmetrical disc position

The AC cutter mounts on the excavator arm and cuts asphalt with a 450 mm steel disc on a bearing assembly. Cutting depth is up to 150 mm. Choose the asymmetrical ACa or the symmetrical ACs disc configuration.

ACs SYMMETRICAL ASPHALT CUTTER

Typical work for the asphalt cutter:

- Road repair and maintenance
- Utility trenches in asphalt surfaces
- Cutting along pavements and kerbs
- Cutting out asphalt before landscaping or building work
- Straight cuts where a trench or patch needs a clean edge

Adapters for direct mounting and for S, MS, CW, OQ, Martin, S1/S2 and SW quick couplers are listed in the table. Send us your machine and coupler and we confirm the fit.
