

## CB-mini HYDRAULIC CLAMP DIGGING BUCKET

### Key features:

- **S355JR2 steel on body**
- **HB500 cutting edge**
- **Hydraulic clamp on the bucket**
- **Tiltrotator Compatible**
- **Double pilot check valve** for

safety and work-holding

### Optional features:

- Exchangeable grip add-ons
- Skeleton version available

### Hydraulic clamp bucket for mini-excavators from 1.2 to 10 t

**A digging bucket with a hydraulic clamp on top.** The clamp holds material against the bucket, so the same tool digs, picks up and places. Five sizes, CBR-20 to CBR-90, with widths from 550 to 800 mm, 52 to 245 l SAE capacity and weights from 65 to 202 kg. A double pilot check valve holds the clamp if hose pressure is lost.

### Typical work for the clamp bucket:

- Loading, unloading and sorting stones, pipes and debris
- Placing kerbs, boulders and stones in landscaping work
- Light demolition and clearing brush
- Work in tight sites where a second machine does not fit
- Digging and handling with one tool, without a coupler change

Send us your machine and coupler and we confirm the size and adapter. The adapter list is in the table.
