

DSX NORDIC HEAVY DUTY DIGGING BUCKET

DSX heavy duty digging bucket in the Nordic profile for excavators from 14 to 40 t.
Body in Hardox® 450 steel for rocky ground, abrasive material, demolition and quarries.

Key Features:

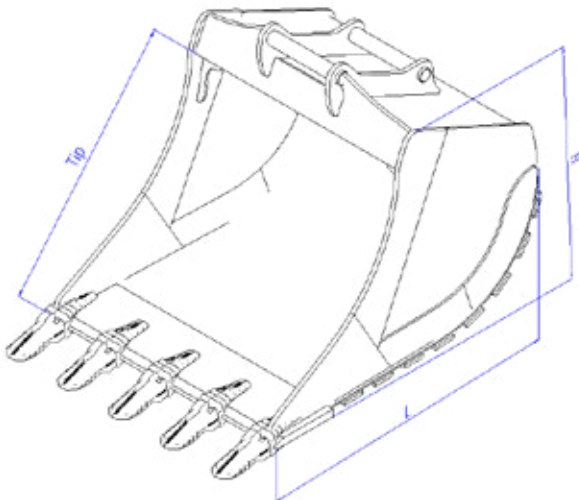

- Body in Hardox® 450 steel
- Nordic profile, heavy duty build
- Four sizes, DS-HD-190 to DS-HD-400
- Widths 800 to 1400 mm
- Teeth systems: CAT series, BYG Future, ESCO Ultra Lok and we confirm the bucket size, teeth system and bracket that fit.
- The DSX is the heavy duty digging bucket in the Nordic profile for excavators from 14 to 40 t. The body is Hardox® 450 steel, so it resists wear in rocky ground, abrasive material, demolition and quarry work.

Hardox® In My Body certification (option):
the bucket can be built to the requirements
of the Hardox® In My Body programme,
which confirms genuine Hardox® steel
in the wear parts.

The Nordic Heavy Duty Digging Bucket is used for:

- Very hard ground (rocky terrain, abrasive materials)
- Demolition and heavy excavation
- Long working hours with little time for maintenance
- Quarries and mines where the bucket has to last a long time
- Excavators from 14 to 40 t working in rock or abrasive material
