

GP

GENERAL PURPOSE BUCKET - FLAT TOP

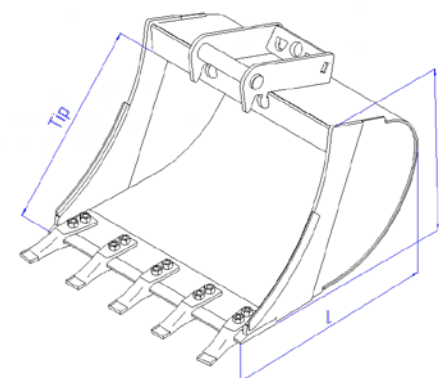

Base features:

- **Double radius shell**
- **Double conical shell**
- Side cutters
- **Bolt-on teeth** / no teeth
- **Front sides from GP-40**
- **Protected weld seams** bottom-sides
- **Flat top** design

Optional features:

- Welded teeth (CAT, BYG, MTG, and other)
- Wear bars

General purpose digging bucket with a flat top for mini and midi excavators from 0.6 to 10 t. It digs, trenches and loads in loose earth, sand, gravel and firm clay. Six sizes, GP-10 to GP-95, 250 to 1000 mm wide, 12 to 377 litres (SAE). The shell has a **double radius** and a **double conical shape**: it is narrower at the back than at the cutting edge, so the load slides out when the bucket is emptied. Three to five teeth depending on width. Direct fit OEM bracket, or built for your quick coupler or S-system (S30 to S90).
