

RGP SKELETON ROD GP BUCKET

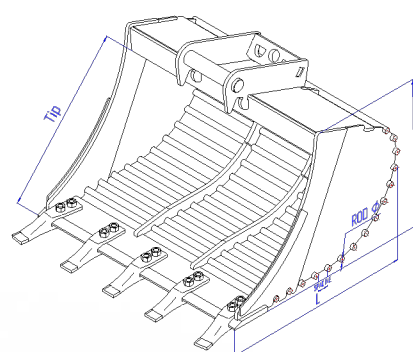

Skeleton buckets for mini and midi excavators from 1.2 to 10 t, built on the GP digging bucket. Fine material falls through the bottom and stones, rubble and roots stay in the bucket. Three bottoms: RGP with steel rods, SGP with S355 ribs and GPO with a plate cut with holes. Five sizes each, -20 to -95, 600 to 1000 mm wide. The **flat top** takes the common European brackets. Teeth: bolt-on, CAT, BYG or ESCO.

Main features:

- based on GP bucket,
- steel rods on bottom,
- replaceable rods,
- hardox rods available,
- special shape rods available,
- sidecutters.
