Standard buckets mini-ex set no1

GPL - GENERAL PURPOSE DIGGING BUCKET

Designed for efficient excavation of common materials like dirt, gravel, and loose soil, this bucket is ideal for a variety of tasks including trenching, foundation prep, and landscaping projects. Its robust build ensures longevity on the job site.

Model	Machine class [t]	Width [mm]	Tip radius [mm]
GPL-10	0.6 - 1.2	250 - 500	296
GPL-20	1.2 - 1.8	250 - 600	370
GPL-30	1.8 - 2.5	300 - 600	438
GPL-40	2.5 - 4.0	300 - 800	518
GPL-60	4.0 - 6.0	300 - 1000	611
GPL-75	6.0 - 7.5	300 - 1000	667
GPL-95	7.5 - 10	300 - 1000	716

RGPL - SKELETON ROD GPL BUCKET

Skeleton digging bucket for a mini-excavator, based on GPL bucket, is a attachment designed for sorting and separating materials such as rocks, debris, and aggregates.

Model	Machine class [t]	Width [mm]	Tip radius [mm]
RGPL-20	1.2 - 1.8	600	370
RGPL-30	1.8 - 2.5	600 - 800	438
RGPL-40	2.5 - 4.0	800 - 1000	518
RGPL-60	4.0 - 6.0	800 - 1000	611
RGPL-75	6.0 - 7.5	1000	667
RGPL-95	7.5 - 10	1000	716

GBP - RIGID GRADING & DITCHING BUCKET

Rigid grading and ditching bucket is an attachment designed for tasks such as ditch maintenance, grading, and slope work.

Model	Machine class [t]	Width [mm]	Tip radius [mm]
GBP-10	0.6 - 1.2	600 - 1000	291
GBP-20	1.2 - 1.8	800 - 1200	347
GBP-30	1.8 - 2.5	1000 - 1200	384
GBP-40	2.5 - 4.0	1000 - 1400	384
GBP-60	4.0 - 6.0	1200 - 1600	453
GBP-75	6.0 - 7.5	1400 - 1800	493
GBP-95	7.5 - 10	1500 - 1800	547

GBPH - HYDRAULIC TILTING GRADING & DITCHING BUCKET

Hydraulic-tilting grading and ditching bucket is designed to **enhance** a mini-excavator's **capabilities** in applications such as ditch cleaning, sloping, and contouring. Tilt 45 degrees both ways.

Model	Machine class [t]	Width [mm]	Tip radius [mm]
GBPH-20	1.2 - 1.8	800 - 1200	525
GBPH-30	1.8 - 2.5	1000 - 1200	583
GBPH-40	2.5 - 4.0	1000 - 1500	656
GBPH-60	4.0 - 6.0	1000 - 1500	764
GBPH-75	6.0 - 7.5	1200 - 1600	812
GBPH-95	7.5 - 10	1500 - 1800	903

GPL GENERAL PURPOSE DIGGING BUCKET

Our General-Purpose Digging Bucket is designed for mini&midi-excavators (0,8 - 9,5 tons), offering a balance between size, strength and performance. It features durable construction and versatile teeth suitable for various soil types. Ideal for digging and trenching, it's built to ensure productivity and longevity.

Key features:

- S355JR2 steel on body
- HB500 cutting edge
- bolt-on teeth system

Optional features:

- Lightweight & durable Hardox version
- Second on-teeth cutting edge
- Welded teeth CAT / ESTI / BYG / ESCO

RGPL SKELETON ROD GPL BUCKET

Skeleton Mini-Excavator Bucket is a solution designed for **mini-excavators** ranging from 1 to 10 tons. Drawing on the robust design of our GPL bucket, it is engineered to deliver **superior performance** and versatility in a compact size. This bucket features a top bent section for enhanced **digging efficiency** and offers the option for a **recessed bracket** to suit various system brackets. Customize your digging experience with **rods, ribs, or a perforated bottom**, tailored to your project needs. Additionally, it supports a **range of teeth** options, including bolted, CAT, BYG, and ESCO, ensuring compatibility and performance across different terrains and tasks.

Main features:

- based on GP bucket,
- steel rods on bottom,
- easy to replace rods,
- hardox rods available,
- special shape rods available.

GBP RIGID GRADING & DITCHING BUCKET

Base features:

- **HB500** cutting edge
- **Reinforcement bevel**
- **Round inner profile** for smooth material handling
- Top bent section
- Drainage holes
- Protected weld seams at bottom

Optional features:

- **Recessed adapter** bracket
- HB400 **reversible cutting edge** RCE
- HB500 **rear cutting edge**
- **Frontside** cutting edges HB500
- Wear bars

The Rigid Grading and Ditching Bucket is tailored for mini-excavators and is optimal for tasks like ditch maintenance, grading, and creating slopes. It's available in sizes from 600 mm to 1800 mm, with capacities from 42 dm³ to 504 dm³. Constructed from S355JR2 and Hardox steel and other high-quality materials, this bucket is built to last, featuring a HB500 cutting edge for extra durability. Its rigid top section ensures stability, while wear bars minimize wear on bucket's bottom. A bolt-on cutting edge is available for extended use, and other special features like suction relief holes for sticky soil or drainage holes.

GBPH HYDRAULIC GRADING & DITCHING BUCKET

Base features:

- Top bent section
- **2x45 degree tilt**
- Inner reinforcement bezel
- **HB500 cutting edge**
- **Double pilot check valve** for safety and holding angle
- Optimized weight & capacity
- Optimal Hydraulic **Hose Routing** & Length
- Standard **hydraulic connectors** on adapter plate
- **Replaceable bushings**
- Protected weld seams at bottom
- Drainage holes

Optional features:

- **Reversible cutting edge** HB400
- Rear cutting edge HB500
- Wear bars
- **Cylinder guard** / spill guard
- Additional reinforcement bevel
- HB500 cutting edges as frontsides
- **Recessed bracket** for higher breakout force

The Hydraulic-Tilting Grading and Ditching Bucket offers precise control for mini-excavator grading tasks such as ditch cleaning and contouring. It tilts up to **45 degrees** for efficient work on **uneven terrain** and is compatible with excavators from 1.2 to 9.5 tons. The bucket features **durable construction** with a full-length bottom wear pads and **replaceable pivot bushings**. Optionally equipped with a **reversible bolt-on cutting edge** and additional features like spill guards, this attachment is designed for a **seamless fit** with major brands and to boost productivity.

Hydraulic-tilting grading & ditching bucket offers the ability to tilt up to **45 degrees** in either direction, allowing for **precise and efficient** work.

GP

GENERAL PURPOSE BUCKET - FLAT TOP

**Base features:**

- **Double radius** optimized **design**
- **Double conical** optimized **design**
- **Sidecutters** increasing efficiency
- **Bolt-on teeth** / no teeth
- **Frontsides** (model 4+)
- **Protected weld seams** bottom-sides
- **Flat top** design

Optional features:

- Welded teeth (CAT, BYG, MTG, and other)
- Wear bars

Our **General-Purpose Digging Bucket** is designed for mini & midi-excavators (**0.8 - 9.5 tons**), offering a balance between size, strength, and performance. Featuring a **double radius** and **double conical shape**, this bucket optimizes **fuel consumption** while maintaining excellent **digging capabilities**. Its durable construction and versatile teeth make it suitable for various soil types, ideal for **digging and trenching**. This attachment is built to ensure productivity and longevity on your **next excavation project**.

RGP SKELETON ROD GP BUCKET

Skeleton Mini-Excavator Bucket is an advanced solution designed for mini-excavators ranging from 1 to 10 tons. Drawing on the robust design of our GP bucket, it is engineered to deliver superior **performance and versatility** in a compact size. This bucket features a **flat top** for enhanced compatibility with most popular European bracket systems. Customize your digging experience with **rods, ribs, or a perforated bottom**, tailored to your project needs. Additionally, it supports a range of teeth options, including bolted, CAT, BYG, and ESCO, ensuring **compatibility and performance** across different terrains and tasks.

Main features:

- based on GP bucket,
- steel rods on bottom,
- easy to replace rods,
- hardox rods available,
- special shape rods available,
- sidecutters.

GBH HYDRAULIC GRADING & DITCHING BUCKET

Key features:

- Flat top, bent section inside
- 2x45 degree tilt
- Reinforcement bezel
- Hardox HB500 cutting edge
- **Double pilot check valves** for safety and holding angle
- Optimized weight & capacity
- Optimal Hydraulic Hose Routing & Length
- Standard hydraulic connectors on adapter plate
- Replaceable bushings

Optional features:

- Reversible cutting edge HB400
- Rear cutting edge HB500
- Wear bars on bottom
- Cylinder guard / spill guard
- Additional reinforcement bevel
- HB500 cutting edges as frontsides

Hydraulic-Tilting Grading and Ditching Bucket offers precise control for mini-excavator grading tasks such as **ditch cleaning and contouring**. It tilts up to **45 degrees** for efficient work on **uneven terrain** and is compatible with excavators from 1.2 to 9.5 tons. The bucket features **durable construction** with optional full-length bottom wear pads and **replaceable pivot bushings**. Optionally equipped with a **reversible bolt-on cutting edge** and additional features like spill guards, this attachment is designed for a **seamless fit** with major brands and to **boost productivity**.

Dutch buckets mini-ex set 3

BDP - CLAY DIGGING BUCKET

Model	Machine class [t]	Width [mm]	Tip radius [mm]
BDP-20	1.2 - 1.8	220, 400	369
BDP-30	1.8 - 2.5	250, 400	458
BDP-40	2.5 - 4.0	300, 400	524
BDP-50	4.0 - 5.0	300, 400	668
BDP-60	5.0 - 6.0	300, 400	736
BDP-90	6.0 - 9.0	400, 500	900

The **BDP** (Banaandieplepel) bucket is designed for mini and midi-excavators tackling tough challenges in extremely sticky clay soil and rocky conditions. Unlike a general-purpose bucket, the BDP excels in these environments due to its unique design.

SB - GRADING & DITCHING BUCKET

Model	Machine class [t]	Width [mm]	Tip radius [mm]
SB - 10	0.6 - 1.2	600 - 800	275
SB - 20	1.2 - 1.8	800 - 1000	344
SB - 30	1.8 - 2.5	900 - 1200	403
SB - 40	2.5 - 4.0	1000 - 1200	437
SB - 60	4.0 - 6.0	1000 - 1400	491
SB - 75	6.0 - 7.5	1200 - 1600	574
SB - 90	7.5 - 10	1400 - 1800	647

The **SB** (Slotenbak) Dutch Profile Grading/Ditching Bucket is a **high-performance attachment** specifically designed for mini-excavators. It excels at tasks like **precise grading, ditch maintenance, and creating clean slopes** with a distinctive **Dutch profile**. This optimized design delivers superior results compared to a general-purpose bucket when working on these applications.

PDP - SKELETON BDP BUCKET

Model	Machine class [t]	Width [mm]	Tip radius [mm]
PDP-19	0.6 - 1.2	400 - 600	345
PDP-20	1.2 - 1.8	400 - 700	369
PDP-30	1.8 - 2.5	600 - 800	458
PDP-40	2.5 - 4.0	600 - 1000	524
PDP-60	4.0 - 5.0	700 - 1000	668
PDP-7.5	5.0 - 6.0	700 - 1000	736
PDP-90	6.0 - 10	800 - 1200	900

The **PDP** (Puindieplepel) Skeleton Bucket is a **heavy-duty attachment** designed for mini and midi excavators. It is ideal for a **wide range of demanding tasks** including demolition, excavation, sieving, and loading. The PDP bucket stands out from general-purpose buckets due to its **robust construction and superior performance** in these applications.

BDP DUTCH PROFILE CLAY DIGGING BUCKET

Key features:

- **Optimized Design for Sticky Clay & Rocks:** Ensures smooth material flow, powerful penetration, and effortless scooping.
- **Robust Construction:** Built with high-quality materials to withstand demanding environments and minimize wear on your excavator.
- **Reduced Downtime:** Durable design translates to less time spent on repairs and more time for productivity.
- **Superior Digging & Loading:** Delivers exceptional performance in challenging conditions.
- **Multiple Size Options:** Available in a range of sizes to fit your specific project needs.

Optional features:

- Anti-suction holes
- Tooth version
- HB500 cutting edges as frontsides

Conquer Sticky Soils and Rocky Terrain: The BDP excavator bucket is your champion for challenging environments. Unlike a general-purpose bucket, this specialized attachment tackles **extremely sticky clay soil and rocky conditions** with ease. Its unique design ensures optimal performance and minimizes downtime when encountering tough jobs.

PDP STONE/SKELETON BUCKET DUTCH PROFILE

Base features:

- **Robust construction:** Built with high-quality materials to withstand the rigors of tough jobsites.
- Excellent **digging, loading, sieving, and discharge** properties: Ensures efficient operation and productivity.
- **Versatile attachment:** Available in various sizes and configurations to suit specific needs.

Optional features:

- Reversible cutting edge HB400
- Rear cutting edge HB500
- Wear bars

Unleash Demolition Power: For a wide range of demanding tasks, equip your mini or midi-excavator with the PDP (Puindieplepels) Demolition Bucket. This **heavy-duty attachment** tackles **excavation, demolition, sieving, and loading** with exceptional efficiency. Built with robust construction and featuring excellent digging, loading, and sieving properties, the PDP keeps your projects moving forward.

DS-20	0.6 - 1.8	300 - 600	454
DS-30	1.8 - 2.5	400 - 600	554
DS-50	2.5 - 5.0	400 - 600	620
DS-60	5.0 - 6.0	500 - 800	703
DS-70	6.0 - 7.0	500 - 800	724
DS-90	7.0 - 10	500 - 1000	873

Tackle tough digging projects in harsh environments. The DS Nordic Profile **General Purpose Deep Digging Bucket** for mini-excavators offers exceptional performance in **rocky terrain and abrasive materials**.

PS - UNIVERSAL GRADING BUCKET FOR TILTROTATOR

Model	Machine class [t]	Width [mm]	Tip radius [mm]
PS-25	1.2 - 5.5	1000 - 1200	407
PS-60	2.5 - 6.0	1200 - 1400	509
PS-80	6.0 - 8.0	1300 - 1800	576
PS-120	8.0 - 12	1400 - 2000	628
PS-180	12 - 18	1400 - 2000	657

Achieve precise results with ease. The PS **Scandinavian Grading Bucket**, designed for mini-excavators and optimized for use with a **tiltrotator**, delivers superior control and maneuverability for intricate **grading and finishing tasks**.

KS - CABLE BUCKET & CABLE BUCKET V-SHAPE

Model	Machine class [t]	Width [mm]	Tip radius [mm]
KS-20	0.6 - 3.0	200 - 400	491
KS-50	3.0 - 5.0	300 - 500	635
KS-100	5.0 - 10	300 - 500	857
KSV-20	0.6 - 3.0	100 - 300	567
KSV-50	3.0 - 5.0	100 - 300	635
KSV-100	5.0 - 10	200 - 400	857

Need a trenching solution for cables and pipes? The KS & KSV **Narrow Trench Buckets** for mini-excavators offer options for both straight (KS) and V-shaped (KSV) trenches. KS delivers **clean, straight cuts**, while KSV's wider top simplifies pipe placement and **reduces soil collapse**.

DS NORDIC DEEP DIGGING BUCKET

Key features:

- **Nordic Profile:** Optimized design for superior performance in Scandinavian conditions.
- **Exceptional Digging Depth:** Reach new depths efficiently, maximizing productivity and minimizing machine repositioning.
- **Rugged Construction:** Built to withstand demanding applications and extended use.

Optional features:

- **Heavy-Duty Wear Plates:** Extend bucket life significantly when working in highly abrasive environments.

The Hydraulic-Tilting Grading and Ditching Bucket offers precise control for mini-excavator grading tasks such as ditch cleaning and contouring. It tilts up to **45 degrees** for efficient work on **uneven terrain** and is compatible with excavators from 1.2 to 9.5 tons. The bucket features **durable construction** with a full-length bottom wear pads and **replaceable pivot bushings**. Optionally equipped with a **reversible bolt-on cutting edge** and additional features like spill guards, this attachment is designed for a **seamless fit** with major brands and to boost productivity.

PS mini UNIVERSAL SCANDINAVIAN GRADING BUCKET

Key features:

- Hardox HB500 cutting edge
- Angled sides for safe rotation inside a dug-out and visibility
- Tiltrotator Compatible
- Double bent section (front & back) for extra rigidity

Optional features:

- HB500 Wear Bars
- Reversible Cutting Edge

A planeringsskopa (PS) **universal Scandinavian bucket** is a versatile attachment designed for leveling and grading different types of materials. It is a popular choice due to its **low, wide, and long bottom design**, which provides **excellent visibility and optimal performance** in various leveling applications. The following are some features of a planeringsskopa universal Scandinavian bucket:

Material: High-strength and durable materials are used in the construction of planeringsskopa universal Scandinavian buckets. The bucket's bottom is made from HB400 plate to increase longevity and performance.

Structure: Planeringsskopa universal Scandinavian buckets are designed with a low, wide, and long bottom, which is ideal for leveling and grading different types of materials. The bucket's structure provides excellent visibility for the operator, making it easier to achieve precise leveling results.

KS NORDIC CABLE BUCKET STRAIGHT PROFILE

Carve **clean, efficient trenches** for cables and pipes with the **KS & KSV** Kabelskopa (Trench Bucket) for mini-excavators. This versatile duo offers two distinct profiles to **tackle any trenching project** with precision.

The KS & KSV is the perfect solution for:

- Utility installations (cables, pipes, conduits)
- Drainage and irrigation systems
- Footing and foundation preparation
- Landscape edging and borders
- Any trenching project requiring precise depth and clean cuts

NORDIC CABLE BUCKET TAPERED V PROFILE

Key features:

- **High-Strength Steel Construction:** Built to last, ensuring durability and performance in demanding excavation tasks.
- **Optimized Depth:** Designed for efficient cable and pipe installations, minimizing excess digging.
- **KS Straight Profile:** Ideal for creating clean, straight trenches with minimal sidewall collapse.
- **KSV V-Shaped Profile:** Provides exceptional efficiency for angled sidewalls, allowing for easier pipe placement and reducing soil collapse.

Transform Your Mini-Excavator into a Multifunctional Powerhouse: The Clamp Bucket

Equip your mini-excavator for diverse material handling applications with the innovative Clamp Bucket attachment. This hydraulic attachment goes beyond traditional digging, offering exceptional performance for grabbing, sorting, and even light demolition tasks. Its versatility expands your mini-excavator's capabilities, maximizing productivity on any project requiring a multifunctional solution.

The Mini-Excavator Clamp Bucket is ideal for:

- Loading, unloading, and sorting various materials (rocks, pipes, debris, etc.)
- Landscaping projects requiring precise material placement
- Light demolition tasks and clearing brush
- Streamlining workflows in confined spaces
- Any application demanding versatility and efficient material handling

Upgrade your mini-excavator's capabilities and conquer diverse challenges with the Clamp Bucket. Contact us today to explore the perfect fit for your machine!

GKB DEEP CABLE BUCKET

Dominate deep cable installation projects with the GKB (Deep Cable Bucket) for mini-excavators. This heavy-duty attachment tackles challenging depths and harsh environments, allowing you to efficiently lay cables and minimize disruption

The GKB Deep Cable Bucket is the ideal solution for:

- Deep cable trenching for utilities and power lines
- Telecommunication cable installations
- Street and infrastructure projects requiring deep cable placement
- Any excavation project demanding efficient deep trenching

Upgrade your mini-excavator's capabilities and conquer deep cable installations with the GKB Deep Cable Bucket.

GKB DEEP CABLE BUCKET

Key features:

- **Optimized Digging Depth:** Reach significant depths effortlessly, maximizing productivity for deep trenching requirements.
- **Rugged Construction:** Built with high-strength steel for unmatched durability in demanding excavation applications.
- **Narrow Bucket Profile:** Enables precise trench creation while minimizing excess soil removal.

Optional features:

- **Heavy-Duty Wear Plates:** Extend bucket life significantly when working in abrasive soil conditions.

RGPR SKELETON DIGGING BUCKET

Base features:

- C45 steel circular rods
- BYG teeth

Optional features:

- Side rod reinforcement
- Special HD Hardox rods
- No teeth option
- Removable rods

Model	Machine class [t]	Width [mm]	Weight [kg]	CAP. SAE [l]	Teeth	Height [mm]	Tip [mm]	Lenght [mm]	Spacing [mm]

Standard buckets mini-ex set 2

LR - LAND RAKE

Model	Machine class [t]	Width [mm]	Tip radius [mm]
CBR-20	1.2 - 1.8	550	322
CBR-30	1.8 - 2.5	600	416
CBR-40	2.5 - 4.0	600	492
CBR-60	4.0 - 6.0	600	654
CBR-95	6.0 - 10	800	643

Land rakes for excavators: Efficiently clear debris and prepare sites for landscaping or construction.

LRS - LAND RAKE SHORT VERSION

Model	Machine class [t]	Width [mm]	Tip radius [mm]
CBR-20	1.2 - 1.8	550	322
CBR-30	1.8 - 2.5	600	416
CBR-40	2.5 - 4.0	600	492
CBR-60	4.0 - 6.0	600	654
CBR-95	6.0 - 10	800	643

Mini Land Rake: Ideal for tight spaces, this low-profile attachment tackles site prep and debris clearing for mini-excavators.

RR - ROOT RAKE

RRH - ROOT RAKE HYDRAULIC CLAMP

Model	Machine class [t]	Width [mm]	Tip radius [mm]
CBR-20	1.2 - 1.8	550	322
CBR-30	1.8 - 2.5	600	416
CBR-40	2.5 - 4.0	600	492
CBR-60	4.0 - 6.0	600	654
CBR-95	6.0 - 10	800	643

Root Rakes: Powerful excavation tools designed to efficiently clear stubborn roots and debris.

RRH - ROOT RAKE WITH HYDRAULIC CLAMP

Root Grapple Rakes: Conquer tough root removal with hydraulic clamping for superior control and efficiency.

Standard buckets mini-ex set 2

RIP mini - RIPPER

Model	Machine class [t]	Width [mm]	Tip radius [mm]
CBR-20	1.2 - 1.8	550	322
CBR-30	1.8 - 2.5	600	416
CBR-40	2.5 - 4.0	600	492
CBR-60	4.0 - 6.0	600	654
CBR-95	6.0 - 10	800	643

Power through tough ground conditions. Mini-Excavator Rippers maximize productivity for efficient trenching and foundation prep.

MR mini - MULTI-RIPPER

Model	Machine class [t]	Width [mm]	Tip radius [mm]
CBR-20	1.2 - 1.8	550	322
CBR-30	1.8 - 2.5	600	416
CBR-40	2.5 - 4.0	600	492
CBR-60	4.0 - 6.0	600	654
CBR-95	6.0 - 10	800	643

Increase mini-excavator versatility. Multi-Rippers tackle tough soil & debris, boosting efficiency in site prep applications.

GRB mini - GRADING BEAM

Model	Machine class [t]	Width [mm]	Tip radius [mm]
CBR-20	1.2 - 1.8	550	322
CBR-30	1.8 - 2.5	600	416

CBR-60	4.0 - 6.0	600	654
CBR-95	6.0 - 10	800	643

Mini-Excavator Grading Beams: Achieve fast, level finishes for driveways, roads & building pads.

AC mini - ASPHALT CUTTER SYMMETRICAL & ASYMMETRICAL MODELS

Model	Machine class [t]	Width [mm]	Tip radius [mm]
CBR-20	1.2 - 1.8	550	322
CBR-30	1.8 - 2.5	600	416
CBR-40	2.5 - 4.0	600	492
CBR-60	4.0 - 6.0	600	654
CBR-95	6.0 - 10	800	643

Precisely cut through asphalt with **Asphalt Cutter** for mini-excavators. Featuring a **450mm steel disc**, this attachment tackles roadworks, repairs, and utility trenching projects with ease.

LR

LAND RAKE

Clear land & debris efficiently. The Land Rake for mini-excavators tackles ground clearing, topsoil raking, and material sorting, maximizing site preparation productivity.

The Land Rake for Mini-Excavators is ideal for:

- Land clearing and site preparation
- Removing vegetation and debris
- Topsoil raking and material sorting
- Landscaping projects requiring efficient ground leveling
- Any application demanding fast and effective site preparation

LAND RAKE SHORT MODEL

Maximize Mini-Excavator Maneuverability: The Short/Low Land Rake.
Ideal for low-clearance areas & efficient ground leveling.

The Short/Low Land Rake for Mini-Excavators is ideal for:

- Land clearing and site preparation in confined spaces
- Basements, tunnels, and areas with low head-room
- Removing vegetation and debris efficiently
- Topsoil raking and material sorting in tight areas
- Any application demanding maneuverability and effective low-clearance site prep

RRH Root Rake Hydraulic Clamp

Equip your mini or midi excavator for the ultimate in land clearing efficiency with the Root Rake with Clamp attachment. This innovative attachment combines powerful root removal with a hydraulic clamp for exceptional control and sorting of debris. The robust design tackles even the most stubborn roots, minimizing soil disturbance and maximizing productivity for any project requiring thorough ground preparation.

The Mini & Midi Excavator Root Rake with Clamp is ideal for:

- Land clearing and site preparation with challenging root systems
- Efficient removal of roots, brush, and debris of all sizes
- Precise sorting and control of cleared materials
- Landscaping projects requiring thorough ground prep with minimal impact
- Any application demanding powerful root removal with superior control

Root Rake

Conquer Land Clearing Challenges with Ease: The Mini-Excavator Root Rake

Equip your mini-excavator to tackle demanding land clearing tasks with the Root Rake attachment. This robust attachment efficiently removes unwanted roots, brush, and debris, minimizing soil disturbance and maximizing productivity for any project requiring thorough ground preparation.

The Mini-Excavator Root Rake is ideal for:

- Land clearing and site preparation
- Efficient removal of roots, brush, and debris
- Landscaping projects requiring thorough ground prep
- Streamlining workflows in land development
- Any application demanding powerful root removal with minimal soil impact

Optional features:

- Bolt-on sides to transform Root Rake into Bucket
- Hardox legs
- Bolt-on bracket

Upgrade your mini-excavator's capabilities and conquer land clearing challenges with the Root Rake.

Contact us today to explore the perfect fit for your machine!

ACA ASYMMETRICAL ASPHALT CUTTER

Base features:

- Sharp, 450 mm Hardox cutting disc: Delivers clean, precise cuts
- High Cutting Depth to meet specific project requirements.
- Exchangeable bushings and disc
- Extra low design thanks to cut out for disc on top of bracket plate
- Robust & durable construction

Optional features:

- Custom disc size

ACS

SYMMETRICAL ASPHALT CUTTER

Conquer Asphalt Challenges with Mini & Midi Excavators: The Asphalt Cutter

Transform your mini or midi excavator into a versatile asphalt-cutting powerhouse with the Asphalt Cutter attachment. Featuring a robust 450mm steel disc, this attachment tackles various asphalt applications with unmatched efficiency and control on projects of any size.

The Asphalt Cutter for Mini & Midi Excavators is ideal for:

- Road repair and maintenance projects (mini & midi excavators excel in confined spaces)
- Utility trenching in asphalt surfaces
- Sidewalk and curb cutting applications
- Precise asphalt removal for landscaping or construction projects on smaller sites
- Any task requiring clean and efficient asphalt cutting, suited for the reach and power of mini & midi excavators

Model	Machine class [t]	Weight [kg]	Disc diameter [mm]	Cutting depth [mm]	Height [mm]

GRB

Grading & Levelling Beams

Grading Beams are a useful attachment for mini excavators that can help achieve a flat surface before further ground work. They are available in different widths and come with different tilting and roller options. Excavator grading beams are **more precise than a standard grading bucket** and are designed to be wide and flat to give you both a large working width and **great visibility**.

Key features:

- Rugged **steel roller**
- **HB500 Cutting Edge**
- **Tiltrotator Compatible**
- **Adjustable Roller**, both up & down
- **High-Quality Bearings**
- Bearing to Roller **Connection secured from mechanical damage**

Optional features:

- **Basic version**: no roller
- **Premium version**: hydraulic tilting
- **Bolt-On Bracket / Adapter**
- 250 mm Extendable **Side Beams**
- Mounting spot for **level measuring** device
- Hydraulic **cylinder guard**
- **HB500 Wear Bars** on bottom

Standard model - rigid with roller

Standard version with a roller on bearings allowing smooth operation. Roller's height can be adjusted.

Model	Machine class [t]	Width [mm]	Weight [kg]	Height [mm]	Length [mm]	Extended length [mm]	Roller diameter [mm]
GRB mini S	2.5 - 10	1000	140	227	712	966	194
GRB mini S	2.5 - 10	1500	182	227	712	966	194

Hydraulic-tilting model with roller

Most versatile and robust version. Everything in standard plus. Tilts up to 45 degrees each side. Double pilot check valve for maximum safety and for holding exact angle.

Model	Machine class [t]	Width [mm]	Weight [kg]	Height [mm]	Length [mm]	Extended length [mm]	Roller diameter [mm]
GRB mini H	2.5 - 10	1000	216	351	712	966	194
GRB mini H	2.5 - 10	1500	261	351	712	966	194

Basic model - rigid without roller

Basic, economic version of the grading bar. Features no roller, so no adjustments are possible. Still very usable in less demanding tasks.

Model	Machine class [t]	Width [mm]	Weight [kg]	Height [mm]	Length [mm]	Extended length [mm]
